CONSULTING SCIENTISTS

March 22, 2007

Mr. Scott Stewart  
Hydrologist  
Water Supply Division  
Department of Environmental Conservation  
103 South Main Street, Old Pantry Building  
Waterbury, Vermont 05671-0403

**RE: Town of Waitsfield  
Waitsfield, Vermont  
Source Evaluation Report for Well R-1**

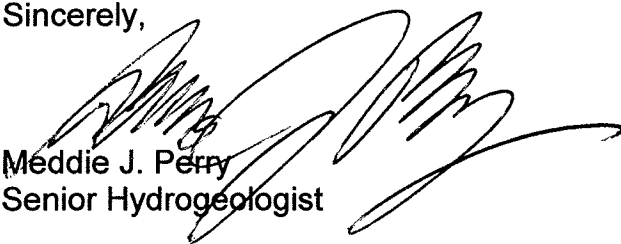

Dear Scott:

Enclosed please find the Source Evaluation report for the Town of Waitsfield Well R-1, prepared by Pioneer Environmental Associates, LLC. (Pioneer).

Source Testing of Well R-1 was conducted during November and December 2006 in accordance with the approved November 21, 2006 Source Testing Application, and in compliance with the 2005 Vermont Water Supply Rule. Based on the source testing, Pioneer is recommending a yield of 186 gallons per minute. Water quality complies with all Maximum Contaminant Levels for a Public Community water source. A Source Protection Area (SPA) has been delineated for Well R-1 based on the testing results. We plan to prepare a Source Protection Plan for the well, after the delineation has been approved.

Please call me if you have any questions, or require any additional information.

Sincerely,

Meddie J. Perry  
Senior Hydrogeologist
