

TOWN OF WAITSFIELD

February 18, 2009

Mr. John Kiernan, P.E.
Phelps Engineering, Inc.
P.O. Box 367
Middlebury, VT 05753

Subject: Waitsfield Municipal Water System
Act 250 Application - Criterion 9K Public Investments

Dear John:

I have reviewed and am familiar with the proposed project plans for the Waitsfield Municipal Water System. The following Town facilities and lands are located adjacent to or on the project site:

- A future Town gravel pit;
- The Waitsfield Elementary School;
- The General Wait House;
- The Waitsfield Fire Station;
- A small park adjacent to the Town Offices;
- The Waitsfield cemetery; and
- Recreational fields.

I understand that subsurface piping will be installed in or near the existing road right-of-way near these facilities and will not be visible or interfere with existing uses after construction. During construction, the contractor will be required to provide traffic control and signage to maintain access to the extent feasible.

Based on the available information, it is my opinion that the project will not significantly affect public facilities in the Town of Waitsfield.

Sincerely,

A handwritten signature in cursive script that reads "Valerie Capels".

Valerie Capels
Town Administrator
