Comments:														
"I would suggest selling the Wait House. The town being long-term landlords seems to be a bad idea! The new town office does not fit Waitsfield."														
Answered "no" to "Do you support a new town office project?" But added "not as proposed."														
Left answer for "Do you support a new town office project?" blank, but added "We should renovate current space."														
"1. Voted yes -- BUT first we need to know about complete water system costs -- finalized. First, before we start this new project! 2. Will this move forward? -- The Wait House did not -- costly and no one held responsible for that poor decision! What was voted on the Wait House never happened! 3. Septic system not first in line! 4. Need more busines growth to pay for these projects. More pro-business by the town. 5. Need church for apartment and business use!"														
"I understand the need for new town offices regarding flooding and space issues but I feel that we should take the time to get it right and have major support from the town population. In support of the Methodist Church because it is an historic building that I feel should be made an integral part of town use. Why build something new that could not measure up in aesthetics when we have an existing building?"														
"Cost per square foot would level the cost off a bit due to more square footage at church. Plus the character of the building and support of the historic community in the village would be important."														
"I support the church option if the town is able to purchase that property at a price to make the total comparable to the farm stand option. If not, we should go with the farm stand."
